by Saturday, February 7, 2026
- **Regular Registration**
by Saturday, March 28, 2026

Abstract

- **General Abstract Submission**
by Saturday, November 22, 2025
- **Late Breaking**
by Saturday, December 20, 2025
- **Notification of Abstract Acceptance**
by Friday, January 23, 2026

Welcome Message

Hee Young Kang

President of KSID

Dear Colleagues,

On behalf of the KSID Board and the Scientific Program Committee, I am delighted to invite you to the 33rd KSID Annual Meeting, which will be held in Seoul from April 9-11, 2026.

This year's meeting is especially meaningful, as it will be held in conjunction with the 1st ISID Asia-Pacific (APAC) Meeting—a new regional initiative launched by the ISID to promote scientific collaboration and foster friendships across the Asia-Pacific region.

The Scientific Program Committee has prepared a stimulating and comprehensive program, featuring keynote plenary lectures by world-renowned scientists, the inaugural ISID APAC Symposium, and abstract-driven Free Communication sessions showcasing the latest advances in dermatological research.

We encourage you to make the most of every session, engage in fruitful discussions, and make meaningful connections throughout the meeting.

We also hope you enjoy the unique spirit of K-Science and everything “K” here in Seoul.

We look forward to welcoming you to Seoul.

Masayuki Amagai

President of ISID

Dear Colleagues,

On behalf of the International Societies for Investigative Dermatology (ISID), it is my great pleasure to welcome you to the 1st ISID-APAC Meeting, held in conjunction with the Annual Meeting of the Korean Society for Investigative Dermatology (KSID) in 2026.

This landmark gathering marks the beginning of a new chapter in regional scientific collaboration.

The ISID-APAC initiative was conceived to deepen cooperation among investigative dermatology societies across the Asia-Pacific region – an area rich in scientific talent, clinical diversity, and cultural heritage. By aligning this meeting with established annual congresses such as KSID, we aim to foster stronger ties, reduce administrative burdens, and elevate the visibility of regional science on the global stage.

We are proud to launch this endeavor in Korea, a country that has long contributed to innovation in dermatological research. Through shared lectures, joint symposia, and meaningful interactions, we look forward to building lasting partnerships that transcend borders.

Thank you for joining us for this historic meeting.

We hope it will inspire new ideas, strengthen networks, and advance our shared mission to improve skin health through science.
